

Position Title – Technical Manager

Reports to: COO

JOB DEFINITION

GTconsult is looking for a senior team manager and SharePoint / Office 365 consultant. The individual should be excited about new Microsoft productivity stack concepts, able to chat to both business and end developers and not afraid to get their hands dirty all the while bringing fresh creative ideas to the table.

JOB SUMMARY

The Technical Manager is responsible for the championing of the team responsible for the development and design of major and minor web applications and components for client intranets, workflows, solutions and extranet system as well as graphic and component design of mobile apps.

The team manager will assist the developers to design, develop, test and deliver intranets and solutions on the Microsoft SharePoint platform. They will be responsible for quality and team guidance. Any enhancements and defect resolution will be required on an ongoing basis. They will drive best practices and design methods will be utilized to ensure the success of the projects. They will be comfortable meeting with clients, putting together specification and identifying roles for their developers.

They will be required to have experience in development of solutions, architecture of solutions and problem-solving skills with various technologies.

Flexibility, adaptability, and the ability to learn quickly in various technical and creative environments, while delivering quality work by tight deadlines, are key attributes of this individual.
